

PASSION FOR MOTION

Partner for Life

Electrotherapy accessories 2012

About Enraf-Nonius

Enraf-Nonius has specialised in the development of physiotherapy and rehabilitation products and services since 1925. Be it treatment couches, advanced physiotechnical equipment, products for active and functional rehabilitation or medical fitness, Enraf-Nonius has everything the modern motion specialist desires.

An international network of well-trained product experts places our products within reach of motion specialists worldwide. Functionality, reliability and durability are synonymous with the name Enraf-Nonius – then and now. The latest production techniques, craftsmanship and our company's continuous drive to optimise its products through customer experience confirm the image of the company with a "passion for motion".

The products and services provided by Enraf-Nonius contribute to a longer, healthier and happier life.

Accessories 2012

This catalogue "Electrotherapy Accessories 2012" contains information about all available accessories for Enraf-Nonius equipment for ultrasound therapy, electrotherapy and TENS, myofeedback, shortwave and microwave therapy, thermo therapy, presso therapy and traction therapy. For information on the equipment itself, for the use of equipment and about the therapy we refer to our international website, www.enraf-nonius.com. For information about accessories of other product groups (examination- and treatment couches and active rehabilitation and medical fitness) we refer to the product group catalogues (these catalogues can also be found at www.enraf-nonius.com).

ACCESSORIES THERMO THERAPY

Paraligno

Paraligno is composed out of paraffin mixed with birch sawdust. It can be used for any packing size. Paraligno has a long term of heat development.

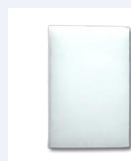

Parafango Battaglia

Parafango is composed out of paraffin mixed with fango (mud). It can be used for any packing size. Parafango has a long term of heat development. Frequently heating till 130° to 140°C for sterilisation does not harm the Parafango.

Paraffin

Pure form paraffin with a melting point of 48°-52°C.
